EXPERIENCE

Artificial Intelligence Data Specialist

Remote

Data Annotation

Freelance

- Evaluated and analyzed AI-generated coding responses across multiple development environments, ambiguity handling scenarios, codebase reasoning workflows, Dockerized systems, and implementation quality assessments.
- Conducted detailed codebase research on React, Django, and Flask applications, tracing request flows across frontend APIs, backend routing, authentication systems, serializers, validation, and persistence architecture layers.
- Reviewed AI-generated implementations for instruction-following, verification quality, architectural software design decisions, overengineering risks, and complex edge-case handling to improve model reasoning reliability.
- Completed high-volume annotation and evaluation tasks involving debugging analysis, technical writing, and evidence-backed behavioral assessments within fast-paced and deadline-driven AI engineering environments.

PROJECTS

Segunda Mano | *React Native, Expo, Expo Router, Firebase, PayMongo, TypeScript, HTML, CSS, JavaScript*

- Developed an online re-commerce application enabling users to buy, sell, post listings, communicate through in-app chat, and manage structured transactions with integrated order tracking and payment workflows.
- Implemented complete marketplace workflows including checkout, order placement, delivery status tracking, and QRPH online payment integration through PayMongo, reducing reliance on unstructured chat-based transactions.
- Built and optimized 10+ responsive mobile screens with Expo Router, React Hooks, Firestore real-time synchronization, and reusable component architecture to improve usability, navigation flow, and maintainability.
- Designed a scalable Firebase-backed architecture supporting authentication, image uploads, real-time database operations, and secure payment processing while handling dynamic listing and order updates from multiple users.

Klazerch | *ASP.NET Core MVC, SQL Server, Bootstrap, Firebase, Node.js, C#, JavaScript, jQuery, AJAX*

- Developed a web-based scheduling management system handling 1,000+ class schedule records across multiple departments using ASP.NET Core MVC, C, Razor Views, and SQL Server for backend data management.
- Implemented complete CRUD operations with AJAX requests, jQuery event handling, dynamic JavaScript-based filtering, and Entity Framework Core integration to improve efficiency and reduce unnecessary page reloads.
- Connected the SQL Server database with Firebase to support synchronization with a React Native and Expo mobile application version, enabling centralized data storage and cross-platform schedule accessibility.
- Designed and developed 5+ responsive dark-themed management pages using Bootstrap 5, custom CSS, Razor templating, and JavaScript while implementing dynamic search and filtering for faster schedule navigation.

EDUCATION

First Asia Institute of Technologies and Humanities

Tanauan City, Batangas

Bachelor of Science in Computer Science

Aug 2023 – May 2027

Awards & Competitions

- ISITE National IT Skills Competition 2026: Python Programming Competition — 2nd Runner Up
- ISITE National IT Skills Competition 2024: Java Programming Competition — Competitor
- CodeChum National Programming Challenge 2025 — Grand Finalist
- CodeQuest School Programming Competition — Champion
- Consistent President's Lister from 1st Year to Present

CERTIFICATIONS & LEARNING

TOPCIT Level 3 Certification (Score: 421)

December 2025

CS50X: Introduction to Computer Science — Harvard University

August 2024

CS50P: Introduction to Programming with Python — Harvard University

December 2024

Networking Basics — Cisco Networking Academy

April 2026

TECHNICAL SKILLS

Languages: Python, Java, C#, C++, SQL, HTML, CSS, JavaScript, TypeScript

Frameworks/Libraries: React, React Native, ASP.NET Core MVC, Expo, Django, Firebase, BeautifulSoup

Developer Tools: Git, GitHub, Docker, Neovim, VSCode, Microsoft SQL Server, Android Studio, Figma

Concepts: REST APIs, Database Management, Object-Oriented Programming, Data Structures & Algorithms

Core Strengths: Problem Solving, Critical Thinking, Adaptability, Positive Attitude, Leadership, Collaboration
